CASES PER 100K POPULATION IN NEW YORK CITY METRO AREA, NEW JERSEY, PENNSYLVANIA, CALIFORNIA AND FLORIDA

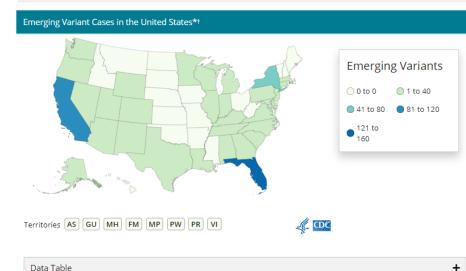

- 3 variants of concern:
 - B.1.1.3 (UK)
 - B.1.351 (S. Africa)
 - P.1 (Brazil)
- Concerns:
 - Ability to spread more quickly in people.
 - Ability to cause more severe disease
 - Ability to evade detection
 - Decreased susceptibility to treatments
 - Ability to evade natural or vaccineinduced immunity

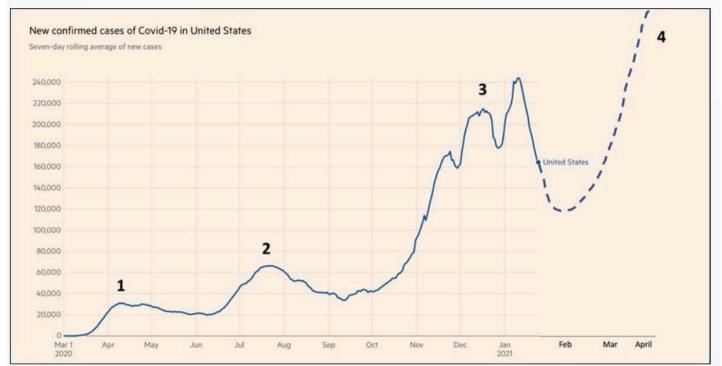

Variant	Reported Cases in US	Number of States Reporting
B.1.1.7	467	32
B.1.351	3	2
P.1	1	1

2. Is the US ready for 4th (B.1.1.7) COVID-19 wave?

Eric Topol** has drawn this graph of the expected increase in new cases in the US as the B.1.1.7 becomes the dominant strain during March 2021. He asked the question, "Are we going to be ready for the 4th wave?"

** Eric Topol is a Professor of Molecular Medicine at The Scripps Research Institute, and a senior consultant at the Division of Cardiovascular Diseases at Scripps Clinic in La Jolla, California. He is Editor-in-Chief of Medscape and theheart.org.

6

Vaccines

Vaccine Effectiveness

Moderna	94%
Pfizer-BioNTech	95%
AZ/Oxford	70%
1%1	66%
Novavax	89%

- All protected against death
- Protected against severe illnesses
- Significant reduction hospitalizations
- Variants may impact but still reduced severe outcomes

Double Masking

- 3 Layers best
- 'Surgical' mask + Cloth mask best combo
- N95 or KN95 no need to double mask
